

Arti Hurria, MD
Professor and Director of the Cancer and Aging Research Program
City of Hope

Objectives

Aging Trends and Comprehensive Geriatric Assessment

1. Understand the association between cancer and aging
2. Describe the components of a comprehensive geriatric assessment
3. Describe the utility of performing a geriatric assessment in the oncology population

Predicting Chemotherapy Toxicity in Older Adults

1. Describe the benefits of utilizing a geriatric assessment in oncology care
2. Review chemotherapy toxicity prediction tools:
 - a. Cancer and Aging Research Group Chemotherapy Toxicity Tool
 - b. Chemotherapy Risk Assessment Scale for High-Age Patients Tool
3. Describe the utility of a geriatric assessment to guide practical interventions
