

CITY OF HOPE PHYSICIANS: TURNING HOPE INTO REALITY

Department of Supportive Care Medicine | City of Hope National Medical Center | Duarte, CA

City of Hope Medical Group Seeks a Full-time Clinical Research Faculty Member

To meet the demands of our growing network in Southern California, City of Hope is seeking Assistant, Associate, or Full Professor in any area of Supportive Care to join our faculty here on our Duarte, California campus. Examples of research areas within Supportive Care include: **Palliative Care, Hospice End of Life, Psychosocial Distress in Cancer Patients, Geriatric Oncology, Pain Research and Technology for Vulnerable Populations.** Our interdisciplinary team - composed of specialist physicians, nurses, social workers, nutritionists and chaplains - works with patients to meaningfully improve their medical, psychosocial, and behavioral health needs during and after cancer treatment. By bringing together clinical research services, treatments and the respective multidisciplinary team in one place, we can deliver truly coordinated care in a way that is convenient for our patients. Areas of special interest are: **aging research, biopsychosocial screening, pain, and gender strengths in health services and social sciences.** For more information about the Department of Supportive Care Medicine, please see our website: [City of Hope | Dept. of Supportive Care Medicine](#)

This position is a rare opportunity to work in a 370+ member integrated, multidisciplinary Medical Group Practice serving an NCI designated comprehensive cancer center in highly desirable Southern California. City of Hope is an expanding institution in both numbers of patients per year as well as infrastructure investment in clinical, academic and research facilities.

Position Highlights/Qualifications:

Join our nationally-recognized team of medical, surgical, and radiation oncology specialists as we seek to hire a full-time clinical researcher in an extraordinary clinical and academic environment:

- Collaborate with investigators in an exciting clinical research environment
- Work in a supportive practice environment with collegial faculty members
- Opportunity for research and individual professional development
- Provide patient-centered care in collaboration with our team of world class physicians
- Applicants must have an MD/DO or PhD Degree or Equivalent Required Related Experience, *and Board certified/eligible*
- The selected candidate for the position must be eligible to obtain or already hold an active California medical license
- Relocation assistance available
- Potential for incentive compensation and an excellent benefits package, including a generous retirement plan

Interested candidates must submit an official application via the City of Hope Physician Careers Internet site: [Physician Careers](#). Additionally, applicants can forward a curriculum vitae and letter of interest to MDRecruitment@coh.org.

Who We Are:

City of Hope is dedicated to making a difference in the lives of people with cancer, diabetes, and other serious illnesses. Our mission is to transform the future of health care by turning science into a practical benefit, and hope into reality. We accomplish this by providing outstanding care, conducting innovative research and offering vital education programs focused on eliminating these diseases.

Founded in 1913, City of Hope is one of only 51 comprehensive cancer centers in the nation, as designated by the National Cancer Institute. City of Hope has been ranked among the nation's "Best Hospitals" in cancer by U.S. News and World Report for 14 consecutive years. City of Hope (COH) is a leading research and treatment center for cancer, diabetes and other life-threatening diseases located in Duarte, California. Over the last 100 years, City of Hope has built a legacy in Duarte of being a world leader in cancer research, treatment, and prevention. Recently, the organization extended its reach beyond Duarte to include 30 community sites in Los Angeles, Orange, Riverside, and San Bernardino counties, steadily moving it to number one in Southern California for inpatient market share and pushing its capacity limits. In 2018, City of Hope began a transformational journey with ambitious goals in the areas of patient care, value-based care and precision medicine, hematology malignancies, stem cell transplants, and meaningful innovations and cures. Integral to the realization of these goals is the expansion of City of Hope to the Orange County market. Orange County has the ideal conditions for City of Hope to demonstrate its ability to expand its differentiated, niche services, including research, genetic capabilities and outstanding, subspecialty care.

Our community includes research associates, scientists, doctors, nurses, allied health professionals, graduate students, fundraising specialists, marketing professionals, volunteers and an extensive support staff. We are united by our desire to find cures, save lives and transform the future of health. Every discovery we make and every new treatment we create gives people the chance to live longer, better and more fully.

City of Hope continues to be a pioneer of patient centered care and remains committed to its tradition of exceptional care for patients, families and communities. Each day, we live out our credo:

"There is no profit in curing the body, if, in the process, we destroy the soul."

The City of Hope Environment:

We want our employees to enjoy all aspects of their professional and personal lives. Recognizing the value in diverse perspectives, we have programs that leverage engagement by bringing our professional community together. In the City of Hope environment, new employee partnerships thrive, with no barriers to freely sharing knowledge. And, in the same way we view patient care from a broad perspective, City of Hope encourages its employees, too, to enhance their view, by increasing their knowledge continually. Here at City of Hope, you will find great opportunities to provide fulfilling service, and to enjoy workplace satisfaction.

Sunny Southern California

- Enjoy year-round professional sports including NFL, NBA, WNBA, NHL, MLB, and MLS
- Unlimited housing options ranging from suburban to elegant neighborhoods in the heart of the city
- Enjoy miles of pristine beaches in areas such as Huntington, Laguna, Newport, Redondo and Santa Monica

Interested candidates must submit an official application via the City of Hope Physician Careers Internet site: [Physician Careers](#). Additionally, applicants can forward a curriculum vitae and letter of interest to MDRecruitment@coh.org.

- Home to UCSD, UCLA, UCI, USC, Cal Tech, and many other world class universities and colleges
- Our locations enjoy endless dining venues, shopping, world-class museums, galleries, concerts, and theaters

City of Hope is an equal opportunity employer that values diversity, and candidates of all backgrounds are encouraged to apply.
